## **HYSTERA Electronic system 1.0**

## **SETUP MANUAL**

## Once you download your copy, please:

1. Extract the downloaded file directly into your "C:" drive using winrar:

<u>First</u>: choose the folder "Hystera Electronic System version 1.0" and click "Extract to":

Second: write "c:\" in the destination path and then click "Ok"

- You will now find the folder named "C:\hystera Electronic System version 1.0" on your computer. Be sure it looks like that and is not 2 folders with the same name inside each other
- 3. Now, please open "Console offline" if you are using offline version or "Console" if you are using online version (files with the black icon):

To ensure the application works correctly, please:

- 1- <u>Always open</u> "the console" when you start using the application and allow it to load. You can then click the first button on the left to launch "Hystera main application"
- 2- After you finish, close the hystera main application and <u>always close</u> "the console" at the end of your work to ensure correct saving of your work
- 3- Use <u>English language</u> only when you put the name and the clinic number of your patients to be saved correctly.
- 4- Do not share your copy with other people since they could disturb file saving process and mix data.
